Techwin™ | Test and Measurement

ODM OPTICAL MODULE MANUFACTURER FOR NETWORK SOLUTION

ODM OPTICAL MODULE MANUFACTURER

Techwin is a trusted **ODM Optical Module Manufacturer** providing customized optical solutions for data centers and telecom networks. We manage design, testing, and production to ensure stable performance and high quality. Our focus includes high speed transceiv energy efficiency, and industry compliance. We w closely with partners to deliver reliable, scalable and cost effective optical modules for modern networking needs

LOW PHASE NOISE FIBER LASER

Techwin offers advanced **Low phase noise fiber laser** solutions designed for sensing, communication, and scientific applications. We focus on stable output, narrow linewidth, and long-term performance. Our fiber lasers are engineered for accuracy and consistency, supporting demanding environments while ensuring easy integration, high reliability, and dependable operation for modern optical and industrial systems worldwide.

OEM 1550NM BUTTERFLY LASER

Techwin provides reliable **OEM 1550nm Butterfly Laser** products built for telecom, sensing, and test systems. We design lasers with stable wavelength, compact butterfly packaging, and strong thermal control. Our solutions support long service life, consistent output power, and smooth system integration, helping customers achieve accurate performance in demanding optical communication and industrial applications worldwide.
